

# China Biomass Production Line Solution

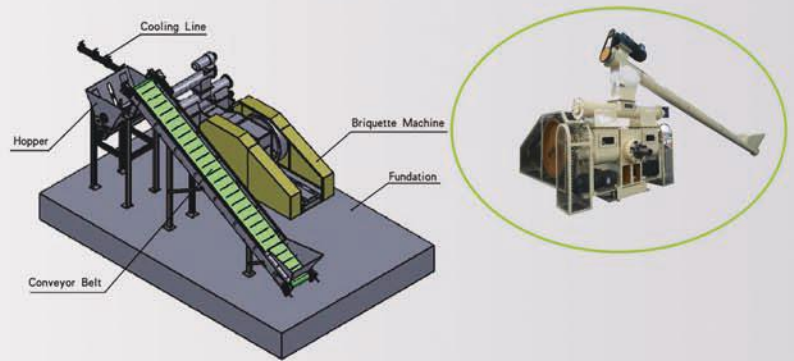

- ✓ *large capacity*
- ✓ *long serving time*
- ✓ *low maintenance*
- ✓ *low power consumption*

## Biomass Briquette Machine

# Biomass Briquette Machine

Mechanical stamping type biomass briquette machine adopts Swedish technology, is the most advanced briquette machine in China. With the oil forced cooling ensures lubrication and two-stage compression process, the output of one set spare part is more than 500 tons.

Model	Capacity (kg/h)	Power (kw)		Dia. of briquette (mm)	Workers	Weight (kg)
		Total	Main			
XNY-1000C	1000	63	45	70-80	2-3	7500
XNY-2000C	2000	120	90	70-80	3-4	13500

1. Optional diesel engine for special order.
2. By using Gr12MoV as material, mold lifetime upto 2000 hours.
3. Mesh frame protect main motor without affecting the heat dissipation.
4. Special design prevents dust from entering the host.
5. Electricity consume as little as 40kWh per hour.
6. Two-way feed system ensures stable operation and high output.
7. Lubrication system has low pressure automatic alarm fuction to protect principal axis.
